

# PulseNet Sequencing Capacity – April 2017

35 labs in 32 states certified.  
4 states without sequencers

# Advancing food safety – CDC perspectives

- Routine whole genome sequencing is swiftly becoming part of routine public health surveillance
- New clinical diagnostic tests need to be followed by reflex cultures if positive
- Update on norovirus research:
  - Human norovirus can be cultivated in “enteroids”
  - Two vaccine trials are advancing

***Anticipate using WGS as core subtyping method by 2019***
