Verse Solutions

Cloud Based Compliance Management Solution

Eric Dano- Verse Solutions Sales Engineer

What is VERSE?

VERSE is a Quality and Compliance management solution, hosted in the cloud, that provides you with **VISIBILITY** and **CONTROL** to manage processes and foster operational excellence.

Affordable

Flexible

Secure

Who is VERSE?

Designed for small workgroups in Quality, EHS and Compliance looking to track events, issue action items and launch corrective actions.

Designed especially for SMB companies that are looking for full functionality in an affordable SaaS solution.

Powered by EtQ's robust Compliance platform, with over 20 years of excellence

Designed for global, multi-site deployments, with the need to integrate compliance across the enterprise.

Who uses VERSE?

Verse Is used by both Large and small to Mid-sized organizations – with a focus on:
Quality Management | EHS Management | Food Safety Management | Life Science Quality Management

The VERSE Solution – How they deliver

Cloud based:

Secure access over the web –
access from anywhere

ACCESS ANYWHERE

RECORD YOUR TASKS

Flexible Configuration:

Match your unique business
needs, without programming –
make it your own!

Return on Investment:

Low cost of entry, with high
returns – productivity, time
saved, and resources saved

SAVE MONEY

CENTRALIZED

Centralized and Secure:

One, secure location for ALL
compliance processes – one
place for collaboration, data
analysis and actions

The VERSE Solution – how they protect the system

They worry about the cloud....so we don't have to.

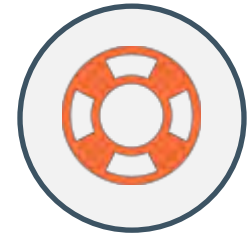

Certified Privacy:

TRUSTe, SafeHarbor and
ISO 27001 certified

Security:

- SSAE 16 certified with Amazon web services
- 99.5% uptime, with 24/7 monitoring and administration

Backups and Recovery:

- Near real-time replicas of your environment
- Recovery within 4 hours
 - Redundant Backups
- Ability to replace environment within 4 hours

How do I Implement VERSE?

Phase 1: Requirements

- Let's get to know your business!
- Let's also get you trained on how to navigate VERSE!

Phase 2: Planning for 2 modules

- We map out the plan for 2 processes in VERSE
- We then build a success plan for these two modules
- We teach you to implement all the rest on your own

Phase 3: Configuration of the 2 modules/processes

- Success team buckles down and builds out the modules to meet your needs
- We meet with you to review all updates and configurations, with best practices going forward

Phase 4: Administration Training and Go Live!

- We teach your administrators how to make changes going forward
- We show you how to configure more modules to meet your needs!
