

SHERWIN-WILLIAMS®

The Sherwin-Williams Team

INSPIRING TRUST & CONFIDENCE

The Sherwin-Williams Team

Built for the Demands of Food & Beverage Facilities

As the industry continues to raise the bar on food safety, our mission remains the same: Deliver seamless, high-performance protection for the systems that keep people safe.

Full Life Cycle Support

We identify high-risk areas and extend asset longevity through site surveys.

Industry Expertise

We leverage deep segment knowledge to deliver tailored solutions that meet the unique challenges of your industry.

Tailored Solutions

We collaborate early to identify segment-specific solutions and reduce long-term costs.

SHERWIN-WILLIAMS ASSET PROTECTION MANAGERS

- Complimentary on-site evaluation of facility assets, surfaces and conditions
- Identification of problem areas impacting safety, compliance and asset life
- Development of a phased, budget-aware maintenance roadmap
- Coating system recommendations to correct issues and extend asset life
- Reinforces facility readiness for FDA, USDA, GFSI, FSMA and customer audits while reducing unplanned downtime
- Recommended contractors across the country

FOOD & BEVERAGE

Support for the Entire Life Cycle of Your Facility

- Critical coatings collaborator for proactive food safety driven maintenance planning
- Providing end-to-end support for CAPEX projects, with a strong focus on hygienic design and long-term performance
- Identifies high-risk zones (moisture, corrosion, high traffic, chemical exposure) and builds custom maintenance plans for shutdowns
- Helps safeguard product integrity, worker well-being and consumer safety
- Reinforces facility readiness for FDA, USDA, GFSI, FSMA and customer audits while reducing unplanned downtime

Oils Processing**

FOOD & BEVERAGE INDUSTRY THEMES

Hyperaware Consumers

- Decline in trust
- Customers demand transparency

Evolving Food Safety Regulations

- Stricter preventative controls
- FDA's enhanced outbreak tracking
- Growing use of third-party auditing

Risk of Outbreaks & Shutdowns

- Recent outbreaks have raised scrutiny
- Facility shutdowns mean revenue loss and reputational damage
- Companies need risk management strategies

Productivity & Efficiency

- Pressure to maximize output with fewer resources
- Demand for streamlined operations and reduced downtime
- Cost control and waste reduction

Sustainable Solutions

- Reduce maintenance cycles
- Lower VOCs
- Green building initiatives

BENEFITS OF HIGH-PERFORMANCE COATING SOLUTIONS

BENEFITS & SOLUTIONS

- Protection from operational risks, contamination and physical damage
- Improved worker safety, increased product quality and reduced maintenance/operational costs
- Durable, easy to maintain, innovative and environmentally responsible

WHERE SHERWIN-WILLIAMS DELIVERS PROTECTION AND PERFORMANCE

Wet Processing Areas

Tanks and Secondary Containment

Dry Processing Areas

Chemical and Battery Storage

Warehouses and Loading Docks

Employee Parking Lot

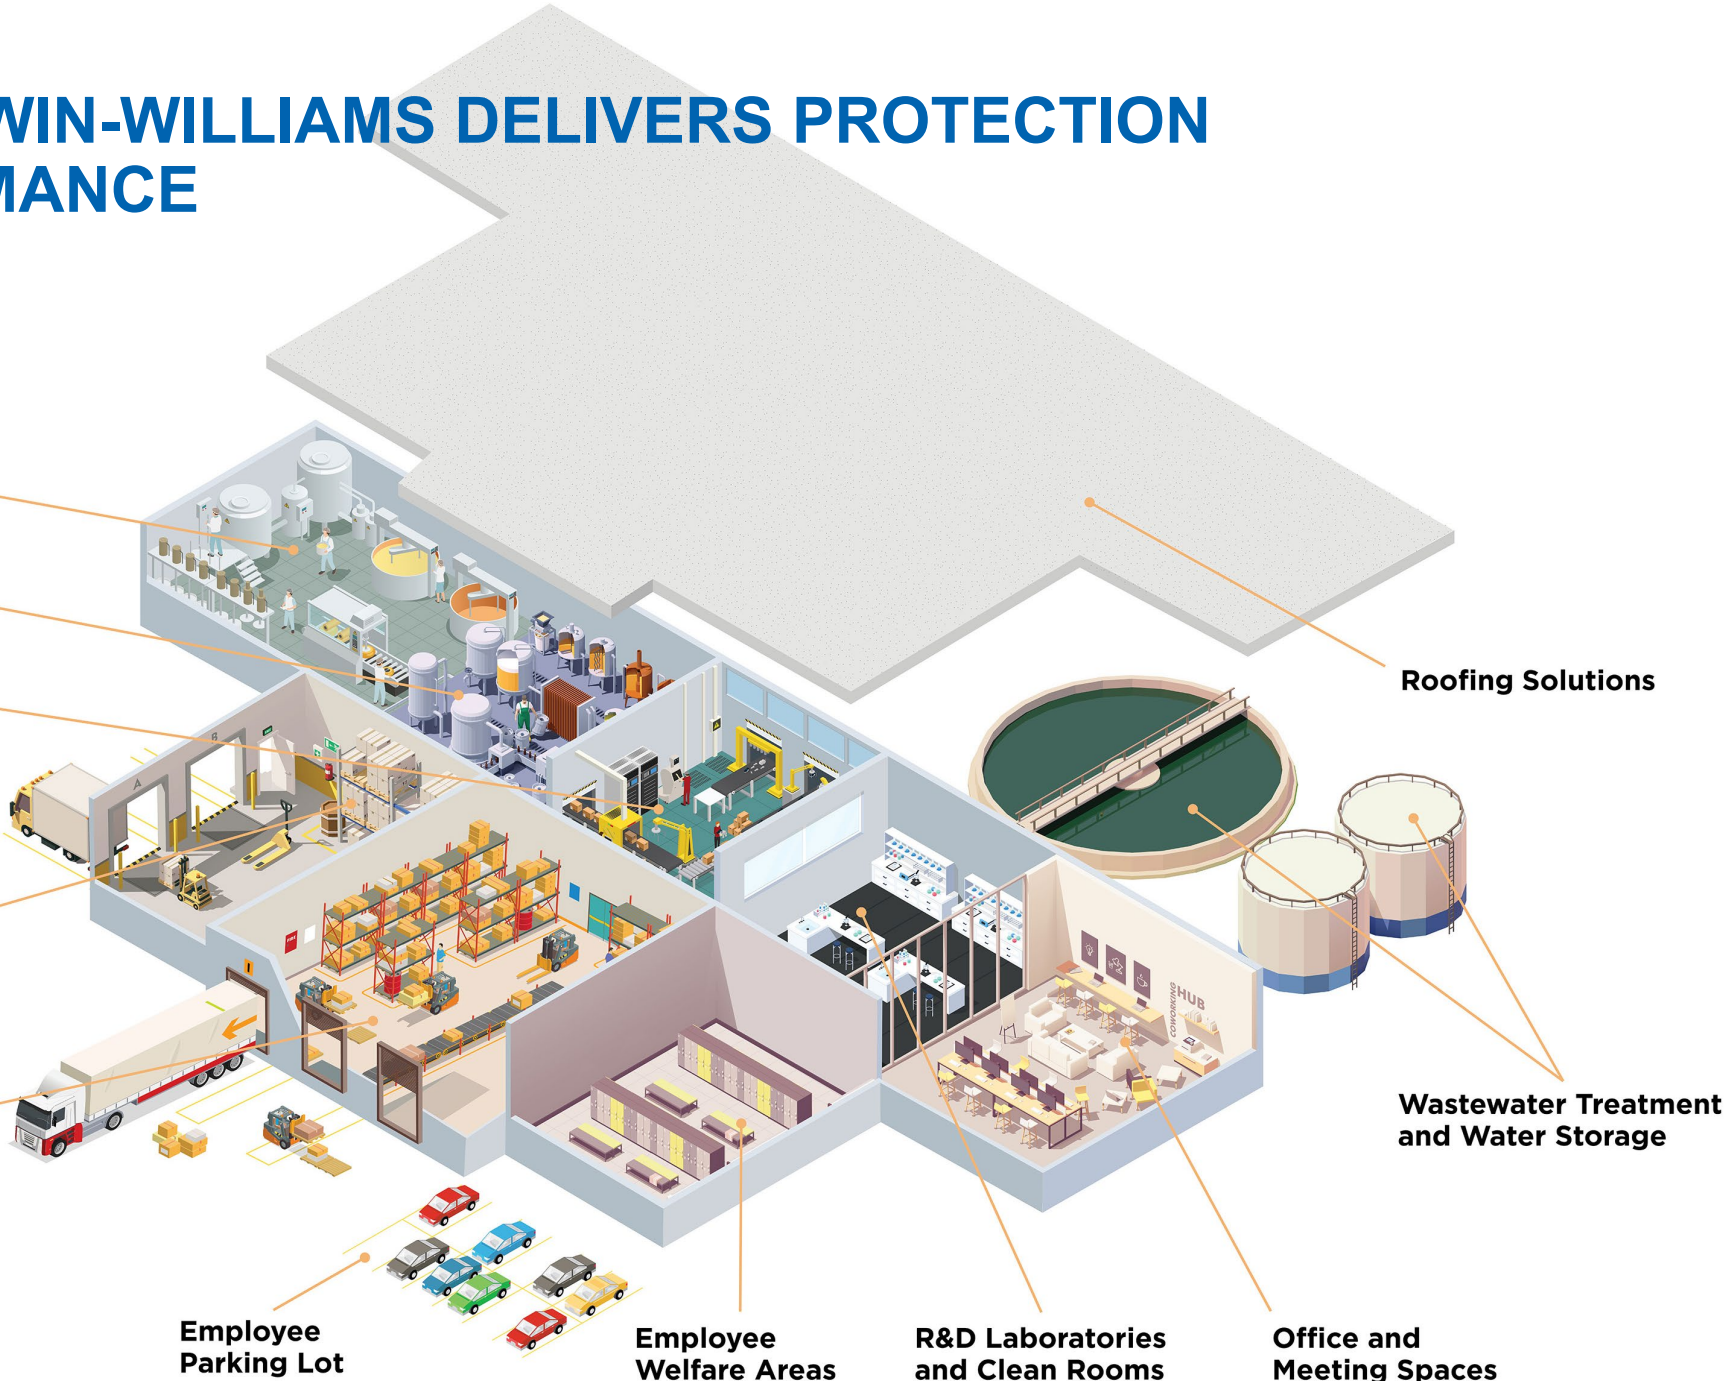

Employee Welfare Areas

R&D Laboratories and Clean Rooms

Office and Meeting Spaces

Roofing Solutions

Wastewater Treatment and Water Storage

FLOORING SOLUTIONS

Your Common Concerns

- Durability and long-term wear
- Slip and impact safety
- Bacteria harborage points in cracks and exposed surfaces
- Resistance to harsh chemicals and extreme temperatures
- Strict regulatory and industry compliance

Value Delivered by Sherwin-Williams

- Tested flooring systems
- Advanced slip-resistant solutions
- Maintenance-minimizing coatings
- Custom-engineered chemical and thermal protection
- Compliance support and guidance
- Anti-microbial solutions

Recommended Solution: Polycrete™ and Resuflor®

FLOORING SOLUTIONS

Before

After

Recommended Solution: Polycrete™ and Resuflor®

WALL COATINGS

Your Common Concerns

- Wall durability
- Contamination and hygiene control
- Chemical and moisture resistance
- Consistent aesthetic finish
- Regulatory compliance
- Ease of cleaning and maintenance

Value Delivered by Sherwin-Williams

- Long-lasting protection against wear
- Hygienic, seamless surfaces
- Superior resistance to chemicals
- Uniform, high-quality appearance
- Support for USDA and FDA standards
- Smooth, washable surfaces for quick maintenance

Recommended Solution: IMP Flex Wall & Resuwall™ Systems

WALL COATINGS

Before

After

Recommended Solution: IMP Flex Wall & Resuwall™ Systems

ROOFING SOLUTIONS

Your Common Concerns

- Protection against severe weather
- Reliable waterproofing to prevent leaks and contamination
- Reduce energy costs
- Maximize roof lifespan and reducing repairs
- Meeting building codes and regulatory standards
- Facility down time and loss of production

Value Delivered by Sherwin-Williams

- Superior weather and UV resistance for lasting protection
- Advanced waterproofing systems for leak-free performance
- Energy-efficient coatings that lower cooling costs
- Durable solutions for extended roof service life
- Guidance to ensure regulatory compliance
- Contamination mitigation

Recommended Solution: Uniflex[®] Fluid Applied Roofing Systems

ROOFING SOLUTIONS

Before

After

REROOFING VS. FLUID-APPLIED ROOFING SYSTEM

Project Cost Savings Estimator

		YEAR 20	YEAR 40	TOTAL COST		
REROOFING		Install 2nd Roof Layer	Full Tear-Off and Replacement of Two Roof Layers			
Roof Sq. Ft.		50,000	50,000			
Cost/Sq. Ft.		\$8	\$20			
Total Cost		\$400,000	\$1,000,000	\$1,400,000		
FLUID-APPLIED ROOFING SYSTEM		YEAR 20	YEAR 30	YEAR 40	YEAR 50	TOTAL COST
		Fluid System Applied	Fluid System Applied	Fluid System Applied	Fluid System Applied	
Roof Sq. Ft.		50,000	50,000	50,000	50,000	
Cost/Sq. Ft.		\$4	\$3	\$3	\$3	
Total Cost		\$200,000	\$150,000	\$150,000	\$150,000	\$650,000
						TOTAL SAVINGS \$750,000

Costs do not include existing roof repairs (membrane and warranty only). Costs will vary depending on conditions and environment. Costs are representative estimates based on published industry studies and data from industry professionals.

Recommended Solution: Uniflex® Fluid Applied Roofing Systems

THERMAL INSULATIVE COATINGS

Your Common Concerns

- Reducing energy consumption
- Corrosion under insulation
- Maintaining precise temperature control
- Managing condensation and preventing moisture damage
- Protecting workers from hot surfaces
- Meeting sustainability and environmental targets

Value Delivered by Sherwin-Williams

- High-performance coatings for maximum energy savings
- Reliable thermal insulation
- Moisture-resistant barriers to prevent corrosion
- Safety solutions that lower surface temperatures
- Low-VOC, sustainable formulations supporting green initiatives

Recommended Solution: Heatflex[®] AEB

THERMAL INSULATIVE COATINGS

Before

After

Recommended Solution: Heatflex[®] AEB

WATER TREATMENT

Your Common Concerns

- Corrosion protection for infrastructure
- Resistance to water treatment chemicals
- Durability
- Meeting EPA standards
- Minimizing maintenance downtime and costs

Value Delivered by Sherwin-Williams

- Advanced corrosion-resistant coating systems
- Formulations engineered for chlorine and chemical exposure
- Proven long-term performance
- Support and guidance for regulatory compliance
- Solutions that reduce life cycle costs

Recommended Solution: DuraPlate® 6000

MAINTENANCE AND SAFETY COATINGS

Applications

- **Line striping:** clearly marks traffic lanes and walkways for improved safety
- **Pavement markers:** enhances visibility and guides vehicle and worker movement
- **Ceiling coatings:** protects surfaces from moisture, stains and wear

Key Considerations

- **Safety and compliance:** high-visibility markings and durable finishes help meet safety standards and reduce accidents
- **Asset protection:** coatings extend the life of surfaces exposed to heavy use, weather and chemicals
- **Maintenance efficiency:** easy-to-clean, long-lasting finishes minimize upkeep and downtime

SHERWIN-WILLIAMS®

The Big Picture

FOOD SAFETY IS ONLY AS STRONG AS THE
SURFACES THAT SUPPORT IT

SHERWIN-WILLIAMS ASSET PROTECTION MANAGERS – FACILITY SITE SURVEYS

We don't just sell coatings; we help owners and managers prioritize risks

- Complimentary on-site evaluation of facility assets, surfaces and conditions
- Identification of problem areas impacting safety, compliance and asset life
- Development of a phased, budget-aware maintenance roadmap
- Coating system recommendations to correct issues and extend asset life
- Reinforces facility readiness for FDA, USDA, GFSI, FSMA and customer audits while reducing unplanned downtime
- Recommended contractors across the country
