

ABOUT OUR COMPANY

REJIMUS is a preeminent regulatory management consulting firm enabling companies in the Food & Beverage, Dietary Supplement, Cosmetic, and Homeopathic industries to achieve and maintain cost-efficient compliance operations and supply chains, while mitigating overall quality and regulatory risks to get ingredients and products to market faster.

We specialize in Consulting for FDA, FTC and USDA matters such as Warning Letters and Import Detentions, and we have expertise in Regulatory Due Diligence, Quality System Optimization, Technical Marketing, electronic NDI and GRAS Notifications. Whether you are a start-up focused on getting your first product to market or a large multi-national firm that seeks to improve product development practices while reducing regulatory liabilities, we can enable you to achieve key company goals efficiently.

FOOD SAFETY & **REGULATORY** EXPERTISE

OUR DEPARTMENTS

Regulatory Guidance Services

RGS

RGS conducts high-level regulatory and litigation consulting, strategic planning and due diligence for customers and projects requiring extensive industry expertise and resources to effectively plan for growth, investigate, or mitigate high risk legal and regulatory matters.

Marketing Review Services

MRS

MRS conducts the development and review of content for labeling, packaging, website copy, claims, claims substantiation and TV or Radio scripts to ensure compliance with current GMP regulations governed by the FDA, FTC or other regulatory body in the marketplace.

Quality Development Services

QDS

QDS heads the evaluation, development and implementation of Best Compliance Practices™ and general technical support for clients. Regulatory support encompasses a variety of business types and reliable outsourced QA/QC for customers with ongoing routine needs.

Business Resource Services

BRS

BRS advises client firms in strategic management consulting to increase market share and profit margin and to anticipate changes in customer demand including the strategic roll out of new capabilities and improving current asset performance.
